PROFILE INFO

Ambitious MCA student with a strong interest in software development, combining foundational programming skills with advanced AI tool utilization and prompt engineering expertise. Driven to build intelligent, efficient, and user-focused applications while continuously learning emerging technologies and strengthening system-level understanding.

EDUCATION

1.MCA

NATIONAL COLLEGE,
BASAVANGUDI, BENGALURU

2024 - Present

2.B.Sc(Physics,Mathematics,Comp Science)

CGPA - 7.8/10
VIJAYA COLLEGE,
RV ROAD , BENGALURU

2021 - 2024

TECHNICAL SKILLS

- **Programming Languages:** Java, C
- **Web Development:** HTML, CSS
- **Database:** MySQL
- **Core Concepts:** OOP, File Handling, Basic Data Structures and Algorithms, Basic SQL
- **Tools:** Visual Studio Code, GitHub
- **AI & Prompt Engineering:** Prompt design, AI-assisted coding, optimization, AI-supported debugging

STRENGTHS

- Strong analytical and logical thinking
- Practical Core Java application development
- AI tools and Prompt Engineering expertise
- Quick learner and adaptable
- Effective problem-solving mindset

LANGUAGES

- English
- Kannada
- Hindi

PROJECTS

• Smart Expense Splitter - Java Console Application

Developed a transaction-based expense management system using Core Java with dynamic balance recalculation, custom expense splitting, partial settlements, greedy debt minimization, and CSV report generation

• Library Management System - Web Application

• Built a single-user web-based system using HTML, CSS, and Java to manage book issuing and returning operations with backend logic implemented through file handling.

• Fake Currency Detection Web Application

Developed a web-based machine learning application using Python integrated with HTML and CSS to detect fake currency. Implemented data processing and prediction logic to classify currency authenticity and display results through a user-friendly web interface.

• Personal Portfolio Website

Designed and developed a responsive personal portfolio website using HTML and CSS to showcase academic background, technical skills, and projects. Focused on clean UI design, structured layout, and a modern dark-themed interface for professional presentation.

• Weather Station Database Management System

Designed and implemented a MySQL database system to store and manage weather-related data such as temperature, humidity, and atmospheric conditions. Utilized SQL queries for efficient data storage, retrieval, and structured data management.

CERTIFICATIONS

- Artificial Intelligence Fundamentals - IBM SkillsBuild (2025)
- Generative AI Content Creation - Adobe (Coursera) (2025)
- OOPs in Java (2026)
- Basics of Data Structures and Algorithms (2026)
- Advanced Prompt Engineering (2026)
